

# Welcome to Chitransh's Kitchen

Simple menu, clear prices, easy orders

A clean restaurant website to display items, prices, and contact details for customer orders.

CHITRANSH PHALKEY

# Technologies Used

Structure, style, and interactivity for web pages

**HTML — page structure: headings, sections, content**

Defines the document structure and content elements

**CSS — styling: colors, layout, animations, hover effects**

Controls visual design and interactive transitions

**JavaScript — interactivity: search, filter, add to cart, section switching**

Adds dynamic behaviors and user interactions

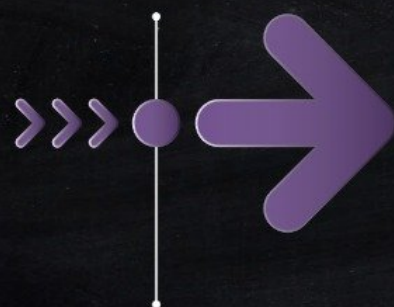

# Layout and Navigation Made Simple

Click a tab, JavaScript loads the section, content shows without reload

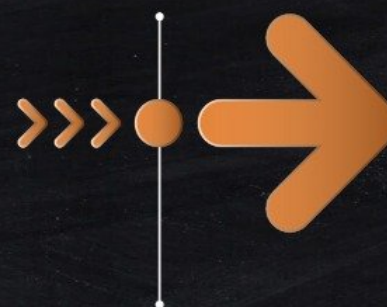

**User clicks Nav item**  
Home, Menu, or Contact selected from the navigation bar

**Content appears**  
Requested section content becomes visible instantly on the same page

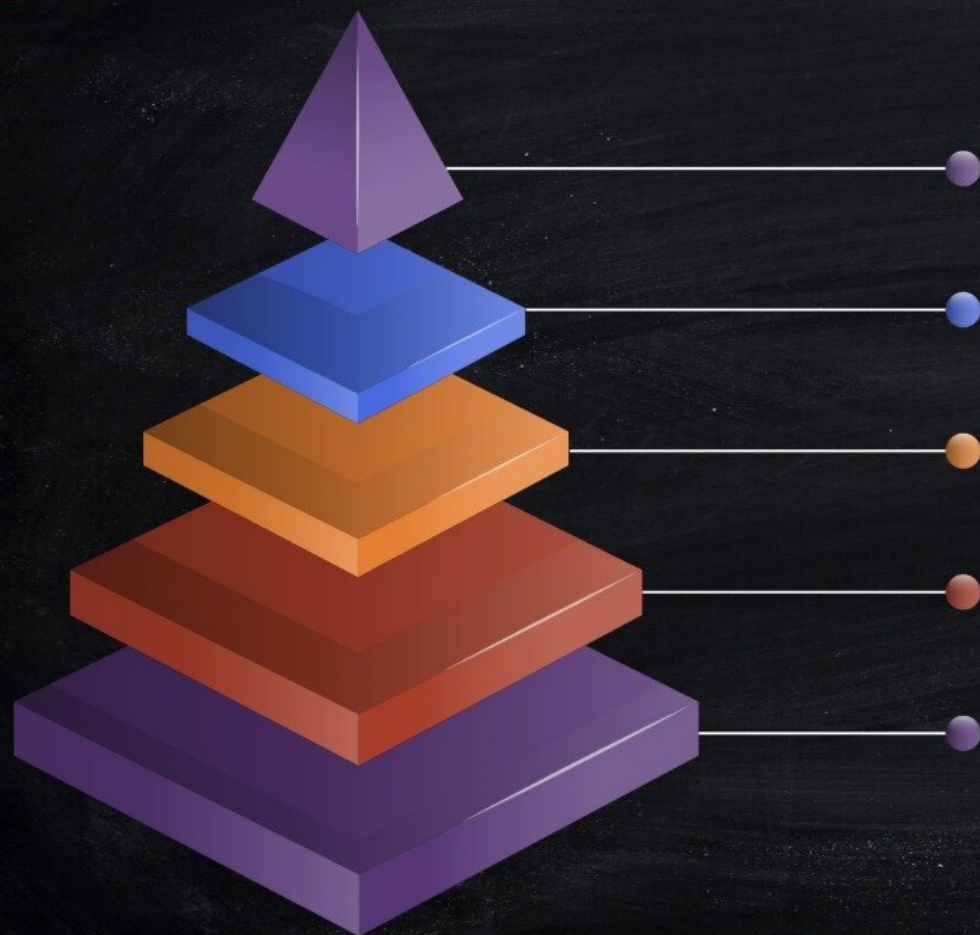

**JavaScript loads section**  
Client-side code shows the chosen section without reloading the page

**Responsive design**  
Layout adapts for phones and desktops; includes icons for Home, Menu, Contact, and phone

### **Splash Animation**

Animated welcome screen on page load to greet users and set tone.

### **Restaurant Name with Gradient**

Gradient text style for a modern, eye-catching brand header.

### **Owner Photo and Facilities**

Owner portrait plus brief list of facilities to build trust and clarity.

### **CSS Animations and Hover Effects**

Microinteractions and hover states to make items feel interactive.

### **Speaker Note**

Home welcomes users; splash and CSS effects make the page modern.

# Menu Section: Quick Browse and Add

Search, filter, view badges and add items to cart

- **Food cards show image, name, and price**  
Visual card for each item with key details
- **Search bar to find food quickly**  
Instant search for item names
- **Filter buttons: Paneer, Chicken, South Indian**  
Tap category buttons to narrow results
- **Veg and Non-Veg badges plus star ratings**  
Clear dietary badge and rating per item
- **Add to Cart button for selected items**  
One-tap add item to cart
- **Dynamic menu: search, filter, view, and add**  
Live updates as users interact
